

Assemblymember Mark Stone
and the Assembly Select Committee on Coastal Protection and
Access to Natural Resources invite you to an

INFORMATIONAL HEARING

Tuesday
February 6th
2 - 4 p.m.

State Capitol
Room 437

Aquatic Vegetation as an Ocean Acidification Management Tool in California

**This special informational hearing is open
to the public and the media.**

Come hear from government officials and researchers about how aquatic plants can help address ocean acidification, a dangerous threat to California's coastal environment that is associated with climate change.

For more information, please call **(916) 319-2029** or visit **asmdc.org/stone**
