Join by Phone: 1-669-900- 6833; Meeting ID: 309 382 217

Webinar details will be posted on the [Recreational Red Abalone Peer Review webpage](#).

California Ocean Science Trust convened a peer review panel to evaluate the scientific merits of two proposed management strategies that have been developed to support the California Department of Fish and Wildlife (CDFW) in designing a recreational red abalone fisheries management plan (FMP).

The final report prepared by the peer review panel is now available for review on the [Recreational Red Abalone Peer Review webpage](#). Members of the red abalone community are invited to participate in a community webinar with the reviewers. During this webinar, participants will have an opportunity to learn about the peer review panel's findings and ask clarifying questions.

All webinar materials will be available on the [Recreational Red Abalone Peer Review webpage](#) as they become available, including copies of the two management strategies final peer review report.

## Webinar Agenda

### **Welcome and Introductions**

- *Introduce members of the California Ocean Science Trust (OST) team and the peer review panel*

### **Webinar Overview & Purpose**

- *Confirm webinar purpose, review agenda, and confirm access to materials*

### **Presentation: Recreational Red Abalone Fishery Management Peer Review Findings**

- *Peer review panelists will share their findings*

### **Review and Discuss**

- *Discussion with webinar participants. Webinar participants will have time to ask the peer review panelists questions about their findings in support of better understanding the final peer review report.*

### **Next Steps & Adjourn**
